

MGT0114 - Entrepreneurship

*Week 5: Stakeholders in Entrepreneurship and
Innovation*

Winter 2026

Plan for today

- **Schedule**
- **Assignment**
- **Entrepreneurship Theory and Practice**
 - **Stakeholders**
 - **Intrapreneurship**

	Theme & Learning Outcomes	Assessments (%)
Week 1 Jan 14	Intro to Entrepreneurship and Innovation	Journal 5%
Week 2 Jan 21	Entrepreneurship, Emerging Tech, Economic Growth	Journal 5%
Week 3 Jan 28	Types of Innovation, Problems and Solutions	Assignment 5%
Week 4 Feb 4	Success Drivers in Tech Sector, Metrics Project/Business Ideation	Quiz 5%
Week 5 Feb 11	Stakeholders in Entrepreneurship and Innovation, Early Adopters	Journal 5% Business/Project Idea 2%
Week 6 Feb 18	Business Goals and Vision, Market Research and Marketing Strategies	Marketing Assignment 5% Group Contract 2%
Week 7 Feb 25	Midterm Exam	Midterm Exam 20%
Week 8	Study Break Week – NO CLASS	

	Theme & Learning Outcomes	Assessments (%)
Week 9 March 11	Describe MVP, Business to Class Business Planning, Revenues, Costs	Informal MVP Update 2%
Week 10 March 18	Contract Negotiation	Informal MVP Update 2%
Week 11 March 25	Budgeting and Finance in IT Projects	Business/Project Plan Part I 7%
Week 12 April 1	Leadership and Organization Design	MVP Demonstration 8%
Week 13 April 8	Developing a Technology-focused Business Plan	Business/Project Plan Part II 7%
Week 14 April 15	Business Plan Presentations and Wrap-up	Demo and Plan Presentation 10% Self, Peer Evaluations 10%
Week 15	Final Exam Week (NO EXAM)	

Assessments

Assessment	Value	CLRs
Journals: Entrepreneurship	15%	1, 4
Quiz (In Class)	5%	1, 3, 4
Assignment – 5 P’s + 5 Personas	5%	1, 2
Written Assignment – Birth/Growth of Tech Company	5%	1, 3, 4
Midterm Exam	20%	1, 2, 3, 4
Business/Project Plan: Idea, Part I, Part II, MVP Demo	30%	2, 3, 4, 5, 6
Presentation, Self and Peer Assessments, Participation	20%	6

MVP Project for MGT0114

You (or you and your partner if you prefer) will:

- Select a project and business idea
- Develop a working, innovative MVP for this idea
- Develop a Business Plan using Lean Canvas for your idea
- Present your MVP and your product to the class

Ideas for MVP Project for MGT0114

Your Project must:

- Be an app (Android, Web, Apple)
- Solve a real problem
- Be the basis of a business
- Innovative
- MVP in 4-6 weeks

Assignment

- Due: Sunday, midnight
- Use template on Brightspace assignment
- Replace highlighted areas with your answers
- Note minimum word count

Group Members (who contributed)

1. [Insert Team Member Name]
2. .

Topic Specifications:

You will develop a working MVP and a business plan for your Project using the Lean Canvas model. As a group, please choose a business that one of your group members would like to start using an emerging technology. This could be a new app, a new online application, an online infrastructure, a new service, etc. Consider the topics covered and the ideas generated in this class to help you decide.

1) What is your idea for your project?

[insert your idea here]

2) What is the working name for your project?

[insert your idea here]

3) Describe your project idea in more detail (~100 words or more)

[insert your description here]

4) What problem(s) will your startup solve? (~100 words or more)

[insert your problem(s) here]

5) Who will your customers be?

1. [insert your customer here]
- 2.
- 3.
- 4.
- 5.

6) What technologies will you use to develop your MVP?

1. [insert your technologies here]
- 2.

Something to think about

"Don't worry about people stealing your ideas. If your ideas are any good, you'll have to ram them down people's throats" - Howard Aiken.

Pioneering computer scientist who led the development of the Harvard Mark I, one of the first large-scale automatic digital computers.

Something to think about

**“Give them
something to talk
about” – Bonnie
Raitt.**

Assignment

MGT0014 – Entrepreneurship

Week 05 Journal – Stakeholders, Key Drivers

- **Due: Sunday, midnight**
- **Use template on Brightspace assignment**
- **Replace highlighted areas with your answers**
- **Note minimum word count**
- **Turnitin will be used for plagiarism**

Your Name: [Insert your name here]

1. In your opinion, how does understanding and managing stakeholders influence the success of an entrepreneurial venture in the tech industry? Can you provide examples from your own experiences, or from what you have observed or read, where stakeholder relationships were either a key to success or a stumbling block for a tech startup?

[Insert your answer here - > 100 words]

2. Reflect on the key drivers of entrepreneurial success in the technology sector discussed in Week 4 (that is, Innovation, Adaptability, Technical Expertise, Access to Capital, Network, Partnerships, and Market Timing). Which of these drivers do you think is the most crucial for a tech startup's success and why? Can you provide an example of a tech entrepreneur or a startup that embodies this key driver?

[Insert your answer here - > 100 words]

3. If you used web sites to assist in your answers, please list them here:
 1. [Insert your reference site here]

Engineering at Anthropic

Building a C compiler with a team of parallel Claudes

Published Feb 05, 2026

We tasked Opus 4.6 using agent teams to build a C Compiler, and then (mostly) walked away. Here's what it taught us about the future of autonomous software development.

To stress test it, I tasked 16 agents with writing a Rust-based C compiler, from scratch, capable of compiling the Linux kernel. Over nearly 2,000 Claude Code sessions and \$20,000 in API costs, the agent team produced a 100,000-line compiler that can build Linux 6.9 on x86, ARM, and RISC-V.

Ring

- Smart doorbells with a built-in camera, microphone, and speaker.
- You can see, hear, and speak to visitors at your door from anywhere using your smartphone.
- HD video, Motion detection, Two-way audio, Live view, Notifications

Ring

- **2013:** Founded as Doorbot by Jamie Siminoff.
- Conceived idea after his wife complained about missing deliveries due to not hearing the doorbell.
- Unable to find an existing solution, he built a prototype that connected to his smartphone.

Ring

Shark Tank Appearance: In 2013, Jamie Siminoff appeared on Shark Tank to pitch Doorbot.

While he didn't secure an investment on the show, this experience became a well-known anecdote after Ring's success.

Ring

2014: Doorbot crowdfunded and garnered significant interest, exceeding its fundraising goals.

Renamed Ring.

Equity investments.

Focus expanded beyond video doorbells to other home security products.

Ring

2018: Acquisition by Amazon - Ring's rapid growth and potential caught the attention of Amazon, which acquired the company in 2018 for a reported \$1 billion.

Now: Ring's product line now includes a wide array of smart home security devices, such as video doorbells, security cameras, alarm systems, and even smart lighting. It also operates the Neighbors app, a social network enabling users to share safety-related information and footage.

Ring

- Simple idea, common problem, excellent design -> a global brand.
- Powerful reminder of the importance of self-belief and determination in pursuing one's goals.

Something to think about

“Believe in your idea, even when others can't see its value. Don't convince others of your idea's worth; **trust** in its potential, **persevere** through the challenges, and **make it happen**” – Jamie Siminoff, founder, Ring

Stakeholders

Introduction to Stakeholders in Technology Businesses

- Individuals or entities affected by or have interest in a business.
- Includes employees, investors, customers, suppliers, and regulatory bodies.
- Stakeholder relationships can have a significant impact on a technology business's success.
- Effective stakeholder management involves understanding and meeting stakeholder needs and expectations.
- Stakeholder engagement can lead to improved business decisions and outcomes.

Employees as Stakeholders

- Employees are key stakeholders in technology businesses, contributing their skills and knowledge to drive business growth.
- Employee engagement and satisfaction can impact productivity, innovation, and retention in tech businesses.
- Employees' skills, particularly in areas like software development or data analysis, are often critical assets for tech businesses.
- Tech businesses often have to compete for top talent, making employee recruitment and retention strategies crucial.
- Tech businesses also have a responsibility to their employees regarding fair wages, safe working conditions, and respectful treatment.

Investors as Stakeholders

- Capital (\$); Expect return on their investment.
- Strategic advice or industry connections, particularly in the case of venture capitalists or angel investors.
- Expectations can significantly shape a tech business's strategies and priorities.
- Maintaining investor trust and confidence is crucial, often requiring transparency and regular communication.
- Tech businesses may also need to balance investor demands for short-term returns with long-term business goals.

Customers as Stakeholders

- Their purchases drive revenue (Doh!).
- Customer satisfaction can impact a tech business's reputation, customer retention, and potential for growth.
- Understanding customer needs and expectations is crucial for product development and marketing in tech businesses.
- Customers' feedback can provide valuable insights for improving products or services.
- Tech businesses also have a responsibility to their customers regarding issues like data privacy and product quality.

Suppliers as Stakeholders

- Suppliers provide goods or services that support a tech business's operations.
- Supplier relationships can impact a tech business's efficiency, costs, and product quality.
- In some cases, tech businesses may rely on suppliers for key components or services.
- Supplier risks, such as disruptions in supply or price increases, can significantly impact a tech business.
- Good supplier relationships, based on trust and mutual benefit, can provide a competitive advantage.

Regulatory Bodies as Stakeholders

- Regulatory bodies set rules and standards that tech businesses must comply with.
- Non-compliance with regulations can result in fines, reputational damage, and other negative impacts.
- Regulatory changes can have a significant impact on a tech business's operations and strategies.
- Effective relationships with regulatory bodies can help a tech business understand and influence regulatory developments.
- Tech businesses may also need to engage with regulatory bodies on issues like data privacy, cybersecurity, or industry-specific regulations.

Communities as Stakeholders

- Tech businesses can impact their local communities through job creation, economic growth, and environmental impacts.
- Community engagement can enhance a tech business's reputation and social license to operate.
- Tech businesses may also have a responsibility to contribute to their communities, such as through corporate social responsibility (CSR) initiatives.
- Community opposition or support can significantly impact a tech business, particularly in relation to issues like data centers or other physical infrastructure.

Partners as Stakeholders

- Partners, such as business partners or strategic partners, can provide resources, capabilities, or market access to tech businesses.
- Partnerships can enable tech businesses to expand their product offerings, enter new markets, or gain competitive advantages.
- Managing partnerships requires clear communication, mutual trust, and alignment of goals.
- Ineffective partnerships can lead to conflicts, financial losses, or missed opportunities.
- Tech businesses should carefully assess potential partners in terms of compatibility, reliability, and contribution to business goals.

Media as Stakeholders

- Media plays a significant role in shaping public perceptions of tech businesses.
- Positive media coverage can enhance a tech business's reputation and visibility.
- Negative media coverage can damage a tech business's reputation and customer trust.
- Tech businesses need to effectively manage their media relations and responses to media inquiries or crises.
- Media also provides a channel for tech businesses to communicate with other stakeholders, such as customers or investors.

Stakeholder Analysis

- Process of identifying key stakeholders, understanding their interests and influence, and prioritizing them for engagement.
- Can help tech businesses focus their resources and efforts where they will have the most impact.
- Tools for stakeholder analysis can include stakeholder maps or matrices.
- Stakeholder analysis should be updated regularly to reflect changes in the business environment or stakeholder relationships.
- Understanding stakeholder dynamics can help tech businesses anticipate and manage potential conflicts or alliances.

Stakeholder Engagement

- Involves communicating with stakeholders, understanding their perspectives, and addressing their concerns.
- Effective stakeholder engagement can lead to better business decisions, improved stakeholder relationships, and enhanced business reputation.
- Techniques for stakeholder engagement can include surveys, meetings, workshops, or stakeholder panels.
- Stakeholder engagement should be an ongoing process, not just a one-time event.
- Stakeholder engagement can be particularly crucial during significant business changes or crises.

Stakeholder Expectations

- Stakeholders have different expectations based on their interests, needs, or relationship with the tech business.
- Understanding stakeholder expectations is crucial for meeting those expectations and managing stakeholder relationships.
- Unmet stakeholder expectations can lead to dissatisfaction, conflict, or loss of support.
- Tech businesses should communicate openly about what they can and cannot deliver to manage stakeholder expectations effectively.
- Tech businesses can use tools like stakeholder surveys or interviews to understand stakeholder expectations.

Stakeholder Impact on Business Performance

- Stakeholder relationships can significantly impact a tech business's performance.
- Positive stakeholder relationships can contribute to business success through increased sales, investment, or employee productivity.
- Negative stakeholder relationships can harm business performance through reputational damage, loss of customers, or employee turnover.
- Tech businesses should regularly assess and manage their stakeholder impacts.
- Stakeholder impacts can also affect a tech business's risk profile, such as risks related to customer satisfaction, employee engagement, or regulatory compliance.

Stakeholder Management Strategy

- Outlines how business engages with its stakeholders.
- Who the key stakeholders are, what their interests and influences are, and how the business will engage with them.
- Include mechanisms for tracking and managing stakeholder relationships and impacts.
- Can enhance business performance, reduce risks, and contribute to sustainable business practices.
- Align with broader business strategy and goals.

Ethics in Stakeholder Management

- Ethical considerations are an important aspect of stakeholder management.
- Tech businesses have ethical responsibilities to their stakeholders, such as honesty, fairness, and respect.
- Ethical stakeholder management can enhance a tech business's reputation and stakeholder trust.
- Unethical practices can harm stakeholder relationships and lead to negative impacts, such as reputational damage, legal penalties, or loss of business.
- Tech businesses should integrate ethical considerations into their stakeholder management strategies and practices.

Discussion

Consider intrapreneur activities. Who would be stakeholders within your organization?

Plan for today
